| 34. | Date you completed this questionnaire: | 12 | Max | 1966 |
|-----|--|-----|-------|------|
| | | Doy | Month | Year |

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I live in the northern part of the city. almost directly north of us is an airport. It has radar like any other airport. These objects must have passed almost directly over the airport. No one else in the city reported these that I know of. I never called the airport, but I am still wondening if these objects were picked up. Operadar,

If I hadn't had binoculars with me at the time I packably would not have reported this. The binoculars gave me a much better view. They must have traveled half way across the sty before I spotted them.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

| 1. When did you see the object? | 2. Time of day: 7 50 Hour Minutes | | |

| 14. | 4. Did the object disappear while you were watching it? If so, how? The objects passed a little north of where I was at, going in an easterly direction. They maintained the said direction at the same speed. Thee substructed my view when the objects became low in the sky. | | | | |
|-----|---|--|--|--|--|
| 15. | 5. Did the object move behind something at any time, particularly a cloud? | | | | |
| | (Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: | | | | |
| 16. | Did the object move in front of something at any time, particularly a cloud? | | | | |
| | (Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: | | | | |
| | | | | | |
| 17. | Tell in a few words the following things about the object: a. Sound There was absolutely no sound. | | | | |
| | b. color Bright metalic abjects. No specific color. | | | | |
| 18. | We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? Since there were many objects at a pretty good distance, it would probably coven been two of them. | | | | |
| 19. | Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving. They were north rathen than directly overhead, traveling east. The circled one was lagging behind somewhat, but napidly caught up to the nest. | | | | |

10 May 1966

Dear Mr

Reference your recent unidentified observation. The information in your letter of 28 April 1966 was not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF Chief, Project Blue Book

April 28, 1966

Dear Sir,

I am eighteen years old; can avid reader of UFO reports. I was sure it was a one in a million chance that I would ever see one. I did better than that.

I was in my back yard Tuesday, the twenty-six, about 7:50 P.M. I had my binoculars and telescope. I didn't have anything to do so I went out to look at the stars, moon, etc. The sky was absolutely clear. I glanced to my left. I couldn't believe what I saw. I hurried and put the binoculars to my eyes. There was about twelve small bright dots. They were just as bright as stars. They flew in a V-shape as birds do, but weren't in a definite pattern. They were flying close together. Soon as I looked through the binoculars, I noticed one was lagging behind a slight bit; it rapidly caught up to the rest. They were traveling in a easterly direction.

I viewed them for only about ten seconds at the most before they went out of sight. For this reason I didn't have time to see their actual shape. I live near an airport and have never seen planes fly that close together and in that pattern. There wasn't any noise, They were pretty high and traveling very fast.

I told my parents and they believed me. About ten minutes later I called a local radio station, but they probably thought it was a joke. I don't blame them. There were no other reports. I seems to me that someone else in the city of Baton Rouge, La. would have seen them, but obviously didn't. I am sure what I saw was no airplanes, stars, or meteorites. I assure this is no joke. Could I please get some information on this.

Sincerely yours,
