Dear Sirs,

On Sunday morning, April 25, 1965, we observed what we feel to be an unidentified flying object, or what is commonly called a "flying saucer".

The time was approximatly 11:35 A.M. and the object appeared to be about four or five miles distant from our position (we were in the southwest quadrant of the Miami-Dade Junior College campus, near 32nd Ave. and 110th st., Miami, Florida).

The object appeared white and from our position looked about an inch across.

It came out of the west and moved eastward until it seemed directly in front of us. The object then appeared to hover for about thirty seconds and then continued eastward until it was over the Atlantic Ocean, at which time it tilted upward and disappeared into the clouds.

Through the entire sighting the object remained below the clouds, until its disappearance into them. The sighting lasted about 3 min.

We would appreciate your forwarding a copy of FTD Form 164 so that we may make our report to you as complete as possible.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

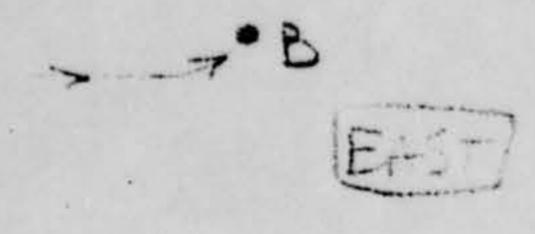

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any change: in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.
