## PROJECT 10073 RECORD

1. DATE - TIME GROUP .	2. LOCATION	
22 Aug 67 23/0317Z	Moose Lake, Minnesota	Multiple
3. SOURCE Civilian 4. NUMBER OF OBJECTS One	Astro(Capella) Capella was on an Azimelevation of approxima	auth of 15 degrees at an ately 6 degrees.
S. LENGTH OF OBSERVATION  30 minutes plus  6. TYPE OF OBSERVATION  Ground Visual  7. COURSE  Stationary  8. PHOTOS  D Yea  No  9. PHYSICAL EVIDENCE  D Yes	Approximately 20 persons watched a star like object in the northern sky for over thirty minutes. Red and green were the main colors noted. The light appeared to change color from red to green as if by slow rotating beacon. The object was brighter than a star. The object appeared to move only slightly both side to side and up and down. The object was still in the same spot after thirty or more minutes.  The one observer wrote back to report that they had seen the same thing in the same place for several nights. They now felt that the object was a star.

SUBJECT

UFO Observation 23 Aug 67

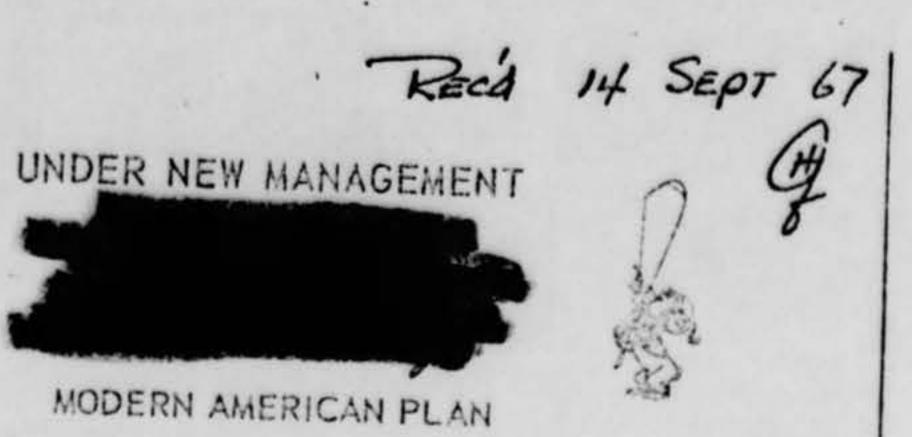

AUG 29 1967

Reference your unidentified observation. The information which we have received is not sufficient for a scientific evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided. Thank you for reporting your observation to the Air Force.

AMES C. MANATT, Colonel, USAF

1 Atch FTD Form 164 w/envelope

This object evidently is a star as we have seen the same thing in the same place several nights since.

TDET/UFO (Maj Quintanilla/70916/mhs/26 Sep 67)
UFO Observation, 22 August 1967

Ely, Minnesota 55731

Reference your observation of August 22, 1967 which you reported to the Air Force. We appreciated your note containing your explanation. The Aerial Phenomena Branch did perform an investigation on your sighting and found that you probably observed the star Capella. At the time of your sighting, Capella would have been on an azimuth of approximately 15 degrees, at an elevation of six degrees. Capella, because of its brightness, has often been misinterpreted for an unidentified flying object (UFO). Again, we appreciated your note in which you expressed your comments on the now identified flying object (IFO).

MES C. MANATT, Colonel, USAF Director of Technology and Subsystems
