Attn: Major Hector Quintanilla

Dear Major Quintanilla:

In answer to your letter of 19 October 1966 requesting me to look into the sighting of Mr. made on 23 August 1966, I have the following to report.

I visited Mr. at his home in Columbus where he lives with Mrs.

A at the rule. I did not make inquiries as to their relationship!

Both Mr. and Mrs seemed like normal, sensible people whose word could be trusted. Mr seemed like normal, sensible people whose public schools and while neither of them have any scientific training to speak of, their story was told in a straightforward, non-sensational manner.

Both of them observed this phenomenon: it was called to Mr attention by Mrs. When they were both out in the backyard at the time of late twilight. The stars were not yet out. I went out in the yard with them and had them go through the full description. Their retelling of the story tallied very well with the original statements made in Form 164 and so there is no point in retelling them here. I checked a few details such as the color of the main object which was white, and that of the ancillary objects was a silver metallic color. The original object occupied about one/tenth of the total field of the binoculars and when it suddenly broke up and five objects fanned out from it to the west, he followed them with the binoculars for a few seconds until they just seemed to vanish. When he turned the binoculars back to the original spot he could no longer find the original object.

This case must remain unidentified unless we take the trouble to ask the Columbus newspapers to publish a short note asking other people in Columbus whether they had seen this sighting on 23 August 1966. I am sure these newspapers would cooperate and I personally think it worth a try. A letter

Major Quintanilla Page 2 3 November 1966 from your office, I believe, would be more effective than one from Northwestern University which is not in Ohio. I would suggest that Lt. Marley address the letter to the editors of the Columbus Citizen and Columbus Dispatch, asking whether they would run a short story about this sighting. This would enable us to make a triangulation and obtain an approximate height of the object. The original object seemed to be like a big star but appeared to have a definite disk to it. Mr. Indicated that he even thought that the center was a little darker than the outside. The binoculars were in good focus since he is used to using them and said he kept checking the focus as he observed them. The central object was under observation for better than 10 minutes before it broke up. It is an odd sighting in that it doesn't fit any general pattern, but I am afraid it must remain unidentified. I don't see how we can quite fit a balloon into the reported maneuver. He stated definitely that it did not appear to be an explosion or a disintegration but rather an expulsion of five objects that moved uniformly out from the central object and at a considerable apparent speed. I believe this covers the sighting unless you are able to get further reports from other sources. Sincerely yours, J. Allen Hynek JAH:1p

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

APPENDENCE OF THE PROPERTY OF

25.	Did you observe the object through any of the following	19?
	a. Eyeglasses Yes No e.	Binoculars (Yes) No
		Telescope Yes No
		Theodolite Yes No
	d. Window glass Yes No h.	Other
	Object or objects which, when placed up in the sky, we SEVERAL LARGE PLANETS (AT ONE LARGER ONE, I THOU SLIGHTLY	THEIR FRIGHTST) JOINED INTO GHT THAT I DETECTED (THROUGH PARKER CENTER WHILE THE ROUND (ONE PIECE) PHASE.

AND THE RESIDENCE OF THE PROPERTY OF THE PROPE

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _AT FIRST THE 611 左 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling. LARGER OBJECT WAS THE ONLY ONE VISIBLE, AFILER I HAD OBSERVED THIS FOR ABOUT 15 MINUTES, WITH BOTH NAKED AND 7X35 BINOCULARS AND I HAD ASCERTAINED THAT IT NOT MOUING RELATIVE TO MY LOCATION CTHRU COMPARISON WAS FIXED OBJECTS AROUND MEJ, I SUPPENLY SAW IT BREAK WITH ABOUT 5 RAPIDLY MOUING OBJECTS, I OBSERVED INTO UPM MOUING TOWARD THE WEST (FANNING-OUT" SLIGHTLY) AND THESE THEN AFTER PERHAPS 3 OR 4 SECONDS THEY DISAPPEARED WAS NOTHING OF THE OBJECT LEFT, COMPLETELY. THERE SKY WAS CLEAR, NO STARS IN SIGHT (A LITTLE TOO THE FOR STARS). I HAVEN PROTURES TO 144 USTRATE BASIAN EARLY

UP (SEE #'S 19

Was anyone else with you at the time you say 31.1 IF you answered YES, did they see the 31.2 Please list their names and addresses:	object too? (Circle One)	Yes No
