N.B. Three hours before, I had asked the Good Lord in a prayer to see a flying saucer abd around 9 hours and 54 minutes, I was brutally thrown from my sleep by an unknown force. It was as if my brain had received a message from the outside and acting on the neurons controlling sleep and my eyelids, as if the epithalamus and the cortex reacted to exterior sollicitations. Since this oheonomenon I was able to get back to sleep and I had visions, for example, on the forthcoming brutal disappearance of the Presidential couple, example (next word illegible) by the Lady President of the United States.
